

ASSEMBLY AND MATERIAL HANDLING

AccuBilt designs and builds innovative and efficient automated assembly and material handling equipment for a variety of industries. Our experienced engineers have the ability to develop new concepts and redesign existing assembly machines using the latest technology. We can help you increase part production and reduce labor costs with our turn-key assembly and material handling solutions.

AccuBilt Offers:

- Custom Material Handling Machines (with vision capabilities)
- End Effectors
- Assembly Machines
- Inspection & Testing Stations
- Custom Tooling

6-Station Indexer with Drill, Pin Feed, Press & Test

Assembly Station

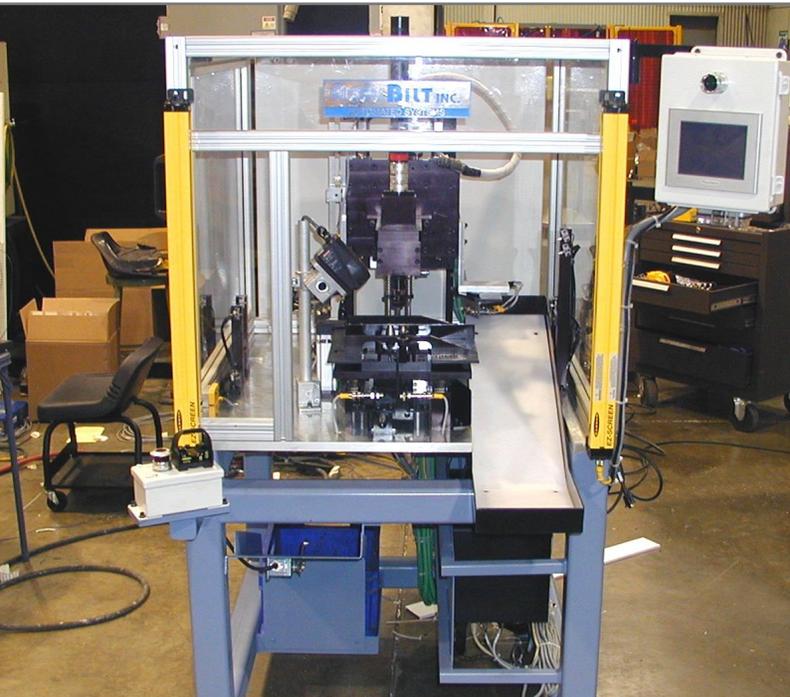

Assembly Equipment Applications:

- Press Operations
- Torque Critical Stations (torque lockout & positioning)
- Clinching Applications (Toggle Lock, TOX lock)
- Riveting (orbital & press forming)
- Drilling & Tapping
- Hydraulic Form & Pierce
- Plastics Degating
- Plastics Assembly & Test
- Fluid Dispensing, Robotic & Dedicated - Including Adhesives & Lubricants

Material Handling Equipment Applications:

- Robotic Machine Tending
- Pick-N-Place
- Conveyor Systems - Including Belt & Gravity
- Bowl Feeding Applications - Bolts, Nuts, Pins, Small Stampings/Brackets
